R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
print("I added this bit in RStudio.")
```

```
## [1] "I added this bit in RStudio."
```

```
head(read.csv("dataset23.csv"))
```

```
##   X item_id category price sellable_online other_colors
## 1 1 90291698 Bookcases & shelving units 175         TRUE      No
## 2 2 80280515          Chairs 225         TRUE      No
## 3 3 39287398 Bookcases & shelving units 340         TRUE     Yes
## 4 4 89135944      Sofas & armchairs 1995         TRUE     Yes
## 5 5 29248345 Bookcases & shelving units 906         TRUE      No
## 6 6 9265920   Cabinets & cupboards 2980         TRUE     Yes
##   depth height width
## 1    NA     64    60
## 2    46     76    54
## 3    30    202    40
## 4    99     83   198
## 5    50    226   134
## 6    47    212   203
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
